

Четиво и за Министерството на туризма:

БЪЛГАРСКОТО ЧЕРНОМОРИЕ - С ДЕВЕТНАДЕСЕТ КАРТИ И АТЛАСИ В БИБЛИОТЕКАТА „ДАГ ХАМАРШЕЛД“, НЮ ЙОРК

(съобщение)

В прецизно подбраното от експертите на Българска картографска асоциация (БКА) дарение на библиотеката на ООН „Даг Хамаршелд“, Ню Йорк виждаме представително присъствие на Българското Черноморие. Влизането в картографския отдел на библиотеката на ООН има символично значение не само за черноморските общини. Това е глобалния архив на картите на ООН. Българските дипломати и картографи, забелязаха и отстраниха един пропуск в информационното представяне на нашата страна. България от десетилетия не бе попълвала своята колекция от издания и карти в ООН.

Ето с какво и как присъства вече нашето крайбрежие в информационния център на Световната организация. Анотациите са на английски език:

Оригиналната инициатива на Българската картографска асоциация бе подкрепена от ICA, която представи българското дарение на своята страница cartography-gis.com/, като пример, достоен за следване.

Остава да си пожелаем тези съвременни картографски продукти да се предлагат на територията на българското Черноморие. Картата е не само реклама. Тя е най-добрата реклама за съвременния турист, тъй като има доверието му.

Но, това е друга тема
